ALTER 

PRO 500 ANTI-GRAVITY TREADMILL®

THE ULTIMATE IN REHAB & TRAINING FOR ELITE ATHLETES

The next generation in the Pro Series from AlterG®, the Pro 500 Anti-Gravity Treadmill® offers athletes the ultimate in unweighted recovery and performance training. With NASA technology, the Pro 500 uses positive air pressure to precisely reduce gravitational forces on your athletes by as much as 80% – so you can start rehabbing sooner or increase training volume for peak performance with less risk of injury.

Pressurised bag creates an “anti-gravity” chamber by providing lifting force from application of precise air pressure.

Exportable reports help trainers and athletes track progress and train more effectively.

Newly integrated Stride Smart analytics and automated workouts with the AlterG Assistant make it easy to see the direct effects of unweighting.

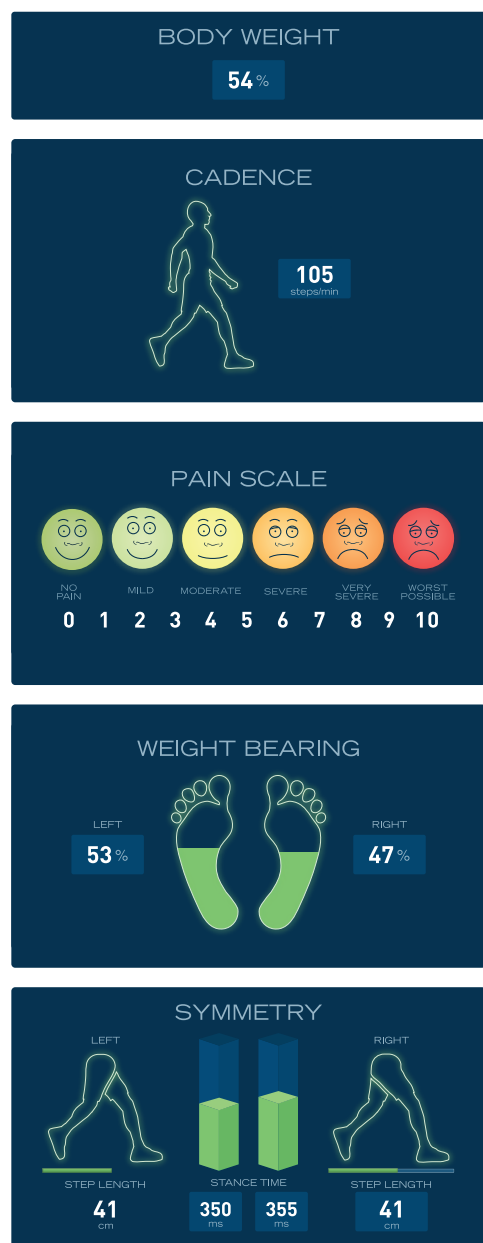

Uniform air lifting force supports normal gait and balance – without impeding natural biomechanics.

Top-of-the-line Woodway® treadmill for elite performance.

STRIDE SMART ANALYTICS GIVE YOU REAL-TIME FEEDBACK FOR MORE EFFICIENT TRAINING

Integrated Stride Smart measures gravitational load and provides simplified visual feedback making it easy to work on improvements in real time.

The AlterG Assistant

Maximise your time and productivity by utilising pre-programmed workouts or develop your own for a customized experience.

Cadence

Improvements can lead to normalised gait, reduced injury risk, and improved running form.

Pain Recording

Correlating gait and unweighting with athlete-reported pain scores helps establish optimal parameters for training and tracking progress.

AT LOWER SPEEDS

Weight Bearing Symmetry

Improves balance control and reduces risk of pain and joint degeneration from overuse in the unaffected leg.

Step Length Symmetry

Improves symmetry for increased step length, better speed, and more efficient gait.

Stance Time Symmetry

Helps users correct asymmetries to achieve increased step length, running speed, and improved stance time.

LIVE VIDEO MONITORING

A built-in anterior view camera enables live video monitoring, helping athletes see abnormal gait patterns they may not feel.

PRO 500 ANTI-GRAVITY TREADMILL®

Specifications	Pro 500
Woodway Treadmill	Included
Body Weight Adjustment	100% to as low as 20% in as little as 1% increments
Speed	0-18 mph
Starting Speed	0.1 mph
Reverse	-10 mph
Incline	15%
User Weight	85-400 lbs

Do you have a Pro 200 or Pro 200 Plus? Ask about our upgrade options!
